FEATURES & BENEFITS

ALL POLARIS ENGINEERED WINCHES COME WITH:

WARRANTY

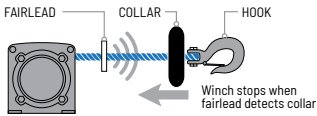

- ✓ INTEGRATED WIRING, MOUNT, PREASSEMBLED
- ✓ HOOK WITH STRAP
- ✓ CUT STEEL GEARS & SEALED DRIVETRAIN
- ✓ SEALED PERMANENT MAGNET MOTOR

Retrieve cable 5x as fast as standard mode on other Polaris winches. Get back to riding or complete your task quicker.

1. Set winch dial to N (Neutral) to manually pull the rope out and secure the hook to your anchor point
2. Set winch dial to L (Low) for maximum pulling power while winching your load
3. Set winch dial to H (High) for retrieving the rope 5x faster with Rapid Rope Recovery

Auto Stop technology protects and extends the life of your winch by automatically stopping the winch at the end of pull to prevent over-spooling. While plowing, it prevents the plow frame from bending by stopping the winch once the plow has been lifted.

With its lightweight, yet extremely strong, design and superior flexibility, this 50 ft. long synthetic rope is easy to handle and can stand up to any tough job.

This convenient remote operates your Polaris winch wirelessly from within 50 ft. of the vehicle. Operate your winch safely outside your vehicle while on the job site or trails.

As serious riders ourselves, we get it. And everything we design is to get (and keep) you going on the ride of a lifetime. We're for every style of rider looking to go beyond the expected with a ride that will make your story epic.

WHY CHOOSE PRO ARMOR?

SUPERIOR PERFORMANCE & DURABILITY

LIFELONG PERFORMANCE

- Every tire is designed and constructed with **longevity** in mind
- **3,000+ mile rated** (4,828 kilometers)

PREMIUM PROTECTION

- Pro Armor makes tires with **extra protection** exactly where it's needed most – the sidewall
- **Triple-belted sidewalls** keep your tires more resistant so you can keep going. Many competitors only use double-belted sidewalls

TOUGH TIRES

TIRE SEALANT

HOW IT WORKS

- 1 Tire sealant remains liquefied inside the tire until a leak develops in the tire or wheel.
- 2 Once a leak occurs, the tire sealant rushes out of the tire and quickly creates a permanent solid plug, maintaining tire pressure so you can continue your ride.

HOW MUCH DO YOU NEED?

$$\frac{\text{TIRE HEIGHT (IN.)} \times \text{TIRE WIDTH (IN.)}}{5} = \text{OUNCES REQUIRED PER TIRE}$$

PREMIUM TIRE SEALANT

- Instantly seals and repairs rim, bead leaks and punctures up to .25" on standard tires and .75" on heavy ply tires
 - Helps seal the tire bead against the wheel
 - Creates permanent repair, helps maintain air pressure for the life of the tire
 - 100% water soluble for easy cleanup
 - Remains fluid and effective in temperatures down to -45° F
 - Will not rust, corrode or pit wheels
 - Easily installed through existing tire valve stem with valve core removed

PS-4 EXTREME SYNTHETIC 0W-50

- Our best extreme high and low temp formula, excellent for high temperatures and racing, even at temps of 130°F, plus easier cold starting even below -45°F
- Expect the best in wear protection thanks to premium PAO and ester base stocks combined with a balance of moly and ZDDP additives
- Polaris exclusive clean engine additive system reduces deposits and carbon build-up for peak performance and power

THE BEST PROTECTION, MAXIMUM PERFORMANCE

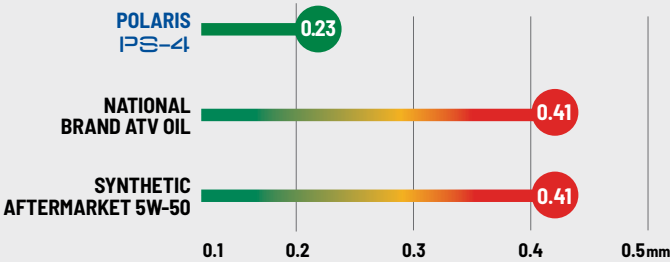

- Powersports grade full synthetics provide long lasting engine protection
- At least 40% improved wear protection compared to all aftermarket oils tested (see engine wear test chart)
- Polaris exclusive clean additive system
- At least 50% less deposits than all aftermarket oils tested (see deposit test chart)
- Cleaner engine with less deposits means consistent maximum power and performance

WIDEST VISCOSITY FOR ULTIMATE PROTECTION

ENGINE WEAR TEST

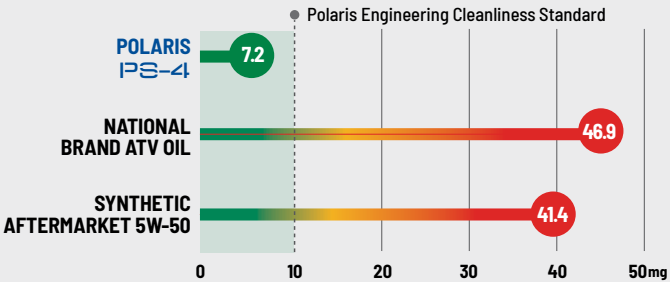

LOWER NUMBER = LESS ENGINE COMPONENT WEAR
LESS WEAR ON PARTS MEANS LONGER ENGINE LIFE

ASTM D4172. In 3rd party testing against 9 competitive products Polaris had 40% or better wear protection compared to all of the tested products. Numbers represent mm of wear scarring measured. Test measures wear at contact points, wear scar is measured for its length and width (in units of mm). Lower wear numbers mean better wear protection and friction reduction.

DEPOSIT TEST

LOWER DEPOSITS = MAXIMUM POWER

ASTM D6335. In 3rd party testing against 9 competitive products Polaris PS-4 had less than half the deposits compared to the next closest product. No other tested products met Polaris Engineering standards for deposit cleanliness. Test measures mass of deposits in mg in high temp, high stress test cycles. Higher deposits will impact engine power and performance.

THE AMERICAN POWERSPORTS CO.

At Polaris, we believe being an American company isn't a sales pitch; it's a way of doing business. It's the place we call home. The place our riders call home.

It all began here in America—over 70 years ago—in a small factory in Roseau, Minnesota. There, our founders forged a company built on American values, grit and ingenuity. That factory is not so small anymore and still operates to this day—creating jobs and producing the best our industry has to offer. The best America has to offer.

Today, we continue to design, engineer and test our industry-leading vehicles with owners like you—right here on American dirt, sand, snow and soil.
